PRICE LIST

OF

The Woodland Gardens

Keswick, Iowa

This price list is The Woodland Garden catalog of 1929.

Various conditions have contributed to this temporary change. We grow all of our own stock except some varieties of lilies and fall bulbs that we are unable to propagate rapidly enough.

Last year owing to overcrowding of work and conditions in our home we were unable to photograph and propagate new varieties sufficient to warrant our own ideals of what a new catalog should contain. Catalogs are expensive things and this year you don't have to buy one! The cost comes off of these bulbs. You are offered practically wholesale prices on most of these gladiolus. We want you folks to buy them and so help us out on room and time to look after a batch of very fancy seedlings that we hope to let you enjoy with us next year. Don't forget that they are coming. They helped us win a good prize on best 25 in the mid-west show last summer.

TERMS

The prices quoted in this list hold good until another list is issued, as long as stock lasts.

On orders amounting to less than \$1.00, 10c should be included in remittance for postage. Orders amounting to \$1.00 or more, accompanied by remittance, will be sent postpaid to any point in the U. S., with the following exception; articles quoted by hundreds and thousands are really at wholesale prices and are F. O. B. C. as is customary. If desired by parcel post remit ample postage with order and balance will be refunded. Cash with orders below \$5.00. Above that amount, 25 per cent with order, balance before shipment.

DISCOUNTS—You may choose additional stock as follows: 5 per cent on orders amounting to \$2.00; 10 per cent on orders amounting to \$10.00; 25 per cent on orders amounting to \$50.00.

All stock is guaranteed true to name and free from disease. In case there should be any mistake or error please tell us, not your neighbor. We will do our best to right it by return of money or replacement, with due increase.

When bulbs or bulblets are quoted by ten or dozen one half may be had at same rate. By 100—25; by 1000—25.

Almost all, even of the smallest bulbs, will bloom if planted early, but spikes will be shorter.

Place your order early, by all means before April first if possible, as after that time many varieties may be exhausted or planted. We don't want to dig them up to fill orders as we did last year!

GLADIOLUS

The Woodland Garden Introductions

BITTERSWEET—(1928) Shown at 1927 Mid-West National show won silver medal for best seedling. It attracted much attention for its general features and especially for the way it kept a long spike of bloom. Eastern gladdists who have grown it last season concur with us in the opinion that it has most unusual qualities of endurance. It will hold a spike of bloom a foot or more in length in a hot show room for four or five days. Color true bittersweet orange lightly splashed dull violet. Medium-sized blooms symmetrically placed on a very long spike, often reaching a height of several inches over five ft. Blooms are beautifully formed and curled. Very robust grower and such a rapid multiplier that we feel justified in putting the price in reach of everybody. We believe it has great promise as a florist flower. Large bulbs. -----Each \$2.00

DOVE OF PEACE—(1929) Cream white. Petals very heavy and waxy. The stamens also are cream so that the appearance of the flower is that of great purity. Its spike and bloom resembles Elf except that the buds are

cream. A good length of spike, with a number open. A very minute stain of vivid crimson sometimes appears on a wing. Late.-----One large bulb \$10.00

TRULA—(1928) Warm creamy buff deeper in tone on lower petals. Has a transparent delicacy of coloring seldom found in gladiolus. Good sized, beautifully formed blooms well placed on a good straight spike. A customer who has grown it says, "I just sit and admire and absorb it". Very lovely in baskets and vases Each 25c

NO 20 SEEDLING—(1928) Large lavender, resembling Louise in form and size but is bluer in tone and very little marking. Nearly self. Somewhat earlier and taller. -----Each 25c

YELLOW BUTTERFLY—(1928) Prim hybrid. Won over all named and unnamed Primis in the 1927 Mid-West show. Extremely early. The brightest yellow gladiolus we have ever seen. Blooms gaily, winged and curled, slightly hooded. Large prim size. It unfailingly attracts the eye across an entire field of bloom.-----Each \$1.00

GENERAL LIST

		Large 1 1/4 in. up	Medium 3/4 to 1 1/4 in.	Small to 3/4 in.	Bulblets

VEILCHENBLAU—(Pf.) Violet blue. The "always running short" gladiolus. Lovely color, good spike and large -----		1.00	.75	.45	10	.75
					100	6.00

A more complete description of most of the varieties listed here will be found in our 1928 catalog. A copy of which will be mailed to you at your request.

The Woodland Gardens Gladiolus Collections

The following collections we believe unequaled by any collections of equal price. Those who try the first collection almost invariably come back the following year for the next best, so that the "Glad" collection sells for us for the next season the "Gladder," the Gladder in its turn sells the "Gladdest". You folks don't know what you are missing if you pass up that Burbank mixture. It is a gorgeous one—too cheap.

"GLAD" COLLECTION—Named varieties in a mixture of all colors. No inferior bulbs in this mixture but bulbs that will provide fine spikes of bloom. The cheapest reliable mixture that can be bought Per Doz. 25c; Per 5 doz. \$1.00.

"GLADDER" COLLECTIONS—This mixture contains named varieties both plain petaled and ruffled in a wide range of colors. These bulbs are assembled for each order so that you may count on a well balanced variety of color and form. All large sized bulbs Per Dozen, 75c; Per 100, \$3.50

"GLADDEST" COLLECTION—Named varieties selected by us from those listed in our catalogues, each bulb labeled correctly, embracing a wide variety of color and types. Many ruffled. You may state whether you wish light or dark colors predominating.---Per Dozen, \$1.50; Per 100, \$10.00

BURBANK HYBRID—Mr. Burbank was for many years an enthusiast in the development of the gladiolus. He originated many of the named varieties. For some years, because of difficulty in keeping the kinds separate, he ceased to name any variety. During that period we procured some of his choicest stock. These bulbs are being sold in mixture at 50c each. Every one is lovely, some of them much more worthy of a name than many of the present named varieties. A gorgeous array of all shades and colors with great diversity of form. Blooming size bulbs, mixed colors. -----Per dozen, 50c; Per 100, \$3.00

ALL SUMMER COLLECTION—This collection includes a great variety of colors and kinds but contains no trash. One hundred of these bulbs will supply quantities of bloom over a period of weeks as the bulbs are in assorted sizes from large to small, but all, even the smallest, practically certain to bloom. The small sizes bloom later in the season. If you want a variety of bloom and many surprises over a long period, this collection will please you.

-----100 bulbs, \$1.25

Wild Flowers

These flowers are grown at The Woodland Gardens, not ravaged from the woods. Price each, unless otherwise noted.

- 23c, five of one kind \$1.00
